

Sheridan Corridor Safety Study

The Denver Regional Council of Governments (DRCOG) is leading the Sheridan Corridor Safety Study to make Sheridan Boulevard safer for all users, whether they are driving, riding the bus, walking or rolling. The study will focus on the corridor between I-76 in the north and US-285 in the south.

This effort is collaborative partnership between DRCOG, Colorado Department of Transportation (CDOT), Denver, Lakewood, Edgewater, Wheat Ridge, Mountain View, and Lakeside.

This study is part of DRCOG's Corridor Planning Program, which is focused on advancing planning for projects outlined in the 2050 Metro Vision Regional Transportation Plan. Sheridan Boulevard is identified in the 2050 Metro Vision Regional Transportation Plan as a priority corridor for safety improvements, in part because it is included on DRCOG's Regional High Injury Network (HIN). The HIN identifies roadways with the highest levels of traffic related deaths or serious injuries.

Sign up for updates to stay up to date on the project and opportunities to get involved!

For more information, please contact Project Manager, Nora Kern, at nkern@drcog.org or at (303) 480-5622.

We make life better!
